

Historic 'STRIKE' or Historic 'BLUNDER'

BSNLEU claimed the two day strike as 'Historic'. It is historic for the following reasons.

- I. This is the first time in telecom sector the pay was recovered for a strike with in one ' Week time'.**
- II. This is the first time the management in telecom did not negotiate with the union on the strike demand either before or during the strike**
- III. This is the first time the strike in telecom has ended without any settlement or agreement. But wage cut for two days.**
- IV. This is the first time a recognized union was completely ignored and insulted by the management.**

After the failure of the strike and pay recovery for two days the members of BSNLEU feel that the strike on 19th & 20th August 2009 is in fact a historic 'Blunder' committed by BSNLEU.
